India

**New Zealand** 

\*\*

**Philippines** 

86% 82% of 12-17 year olds

of 18-24 year olds

were born in Australia.

#### Languages

#### Households

In households where couples with children, or one-parent families live, the percentages attributed to Penrith City LGA's youth population indicates that this cohort were living as the children in these households.

#### Health

18-24 year olds in Penrith City LGA were 7% more likely to have a long-term health condition when compared with Greater Sydney.

Young people with at least one long-term health condition compared to Greater Sydney

The most common health conditions for our young people are asthma and mental health conditions.

Asthma

## How do our young people live?

## Housing

Most 12-24 year olds in Penrith City live in separate houses. However, there has been a slight increase in medium and high density living for young people since 2016.

## **Housing tenure**

Since 2016 there has been a decrease in outright ownership and an increase in rent tenure types for both age cohorts, but significantly more for the 18-24-year-old cohort. These statistics represent houses where young people live as children.

# What do our young people do?

#### Education

## 43%

of 18-24 year olds have completed a non-school qualification. Of these, the most common fields of study are:

6.3% Management and Commerce 5.6% Society and Culture 4.4% Architecture and Building

## Employment

Of our 18-24 year olds: 77% are in the workforce, representing 14,679 of Penrith City residents.

#### Employed

33% employed part-time 41% employed full time 92%

#### Unemployed

**8%** 3% looking for part-time work 5% looking for full-time work 18-24 year olds

#### 1 16% Retail trade

2 16% Construction

3 12% Accomdation/ Food services

#### Income

Where 12-17 year olds reside, incomes are generally lower than those of 18-24 year olds in both Penrith City and Greater Sydney. This may be related to the different life stages of income earners or parents' employment status in relation to the lifecycle of a household.

## **Youth disengagement**

Compared to Greater Sydney, Penrith City has higher rates of youth disengagement from education and /or employment.

Disengagement from education or employment in younger age groups can indicate a lack of access to employment or education facilities or a population in need of targeted services to assist them in gaining a foothold in society.

#### Summary

12-17 year olds typically live in family households, while 18-24 year olds have begun forming their own households, sometimes in medium or highdensity housing. The most common health conditions for our young people are asthma and mental health.

The majority of young people were born in Australia.

Young people account for 17% of the total Penrith population.
