COUNCIL BRIEFS

- Feedback on Council's 2021–22 Draft Operational Plan, and Draft Fees and Charges closes on Monday, 31 May 2021. Don't miss the opportunity to provide your feedback on the plans by visiting yoursaypenrith.com.au/draftoperationalplan or the Penrith Civic Centre, St Marys Business Office or any Penrith City library branch.

Council will consider each and every submission received on the draft documents before they are finalised and reported to Council's Ordinary Meeting on Monday, 28 June 2021.

- Seven in 10 cars are stolen with their own keys. It's called 'Sneak Theft'. There are some simple steps you can take to stop them – POP keys out of sight. LOCK all doors and windows and ensure everyone in the home is doing the same. STOP sneak theft.

Penrith Council is supporting the National Motor Vehicle Theft Reduction Council (NMVTRC) and are highlighting the simple steps motorists can take to prevent vehicle theft.

For your chance to win 1 of 50 Tile Mate Personal Bluetooth Trackers simply complete the short survey at penrith.city/stopsneaktheft to enter and for full terms and conditions.

- Penrith's 3-bin waste service is designed so that the community's waste goes back into the community wherever possible. The sustainable service assists resident in reducing the amount of waste going to landfill and increases the amount of reusable waste going back into the community as other products.

For instance, the green-lidded Food Organics and Garden Organics (or 'FOGO') bin's organic waste is recycled into high-grade compost that is used on local parks and gardens; the yellow-lidded recycling bin's items are remade into new products such as glass on roads; and the red-lidded residual bin's leftover waste is buried in landfill. If you're curious to know what goes where, visit penrith.city/3bins

PUBLIC NOTICES

Pesticide Use Notification Plan

The Pesticide use notification plan for outdoor public places has been prepared in accordance with the requirements of the Pesticides Regulation 2017 (the Regulation).

The aim of this plan is to meet the community's general right to know about pesticide applications made to outdoor public places

owned or controlled by public authorities. Though not required by the Regulation, the notification plan also provides information on how notice will be given of pesticide use in the interiors of identified Penrith City Council buildings.

The plan allows members of the community to take action to avoid potential contact with pesticides, if they wish. The Council ensures that pesticides are applied to public places in a safe, responsible manner, minimising harm to the community or the environment.

This plan sets out how Penrith City Council will notify the community of pesticide applications it makes, or allows to be made, to public places that it owns or controls.

The plan describes:

- Which public places are covered by the Plan;
- Who regularly uses these public places, and an estimate of the level of use;
- How and when the council will provide the community with information about its pesticide applications in public places (that is, what notification arrangements will be used);
- How the community can access this plan and get more information about Council's notification arrangements;
- How future reviews of the plan will be conducted; and
- Contact details for anyone wishing to discuss this plan with Council.

This plan forms a component of Council's Pesticide Management Policy. This policy states that Council uses pesticides in public places when necessary to eliminate unwanted vegetation and pests, to protect public property from pest damage, and to protect users of public places from nuisance danger.

The majority of pesticide use consists of applying herbicides for weed control and applying insecticides to manage certain insect pests. Frequency of programmed applications range from 6–8 times per year for sports fields, 2–5 times per year for parks and gardens, and twice yearly for public thoroughfares.

Bait insecticides are used for termite control and to protect structures and public safety, wherever this is considered an effective solution. Other pesticides used include fungicides, rodenticides, bird baits and large vertebrate baits.

The plan can be viewed Council's website at

penrith.city/pesticide-use

Further information on Council's pesticides can be obtained by calling Penrith City Council on 4732 7777 or emailing council@penrith.city
